From the mountains of California to a forgotten steel vat at the Smithsonian, this "eloquent and soul-searching book" (*Lit*) is "a compelling account of one of American anthropology's strangest, saddest chapters" (*Archaeology*).

After the Yahi were massacred in the mid-nineteenth century, Ishi survived alone for decades in the mountains of northern California, wearing skins and hunting with bow and arrow. His capture in 1911 made him a national sensation; anthropologist Alfred Kroeber declared him the world's most "uncivilized" man and made Ishi a living exhibit in his museum. Thousands came to see the displaced Indian before his death, of tuberculosis. *Ishi's Brain* follows Orin Starn's gripping quest for the remains of the last of the Yahi. 16 pages of illustrations.
