Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates Jonathan Clark

As a tutor of Biology of about 20 years experience I quite often came across students who were struggling with the basics. Most often the subject of the basic biological molecules; proteins, carbohydrates and lipids, was causing them some confusion. Admittedly, for biology students who don't study chemistry, this subject can be a challenge.

So what I have done in this book is give a summary of the most important points about these molecule groups in the easily understandable format, of a series of questions and answers. I have also included a chapter of key words, that I explain, before the main questions; I think it makes sense for you to know the scientific terms before you read about how it all fits together. The final chapter consists of exam questions and answers, to help you with that inevitable test that is coming up soon.

I hope you enjoy this book and that it helps you further understand biochemistry as a whole - what a great subject!

From reader reviews:

Donna Cook:

The book Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates can give more knowledge and information about everything you want. Why must we leave a very important thing like a book Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates? Several of you have a different opinion about publication. But one aim that book can give many facts for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or data that you take for that, it is possible to give for each other; it is possible to share all of these. Book Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates has simple shape but you know: it has great and big function for you. You can appearance the enormous world by start and read a e-book. So it is very wonderful.

Bernard Kovach:

Information is provisions for people to get better life, information presently can get by anyone with everywhere. The information can be a understanding or any news even an issue. What people must be consider whenever those information which is in the former life are hard to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you obtain the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates as your daily resource information.

Michael Larose:

Reading a e-book tends to be new life style within this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire their reader with their story or even their experience. Not only the storyplot that share in the publications. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors nowadays always try to improve their talent in writing, they also doing some analysis before they write with their book. One of them is this Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates.

Theodore Rivas:

That e-book can make you to feel relax. This particular book Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates was colourful and of course has pictures around. As we know that book Biology: Understanding the Structure and Function of Proteins, Lipids and Carbohydrates has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore not at all of book are generally

make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that.
