Free Radicals in Biology and Medicine

Barry Halliwell, John M. C. Gutteridge

Free Radicals in Biology and Medicine Barry Halliwell, John M. C. Gutteridge

Free Radicals in Biology and Medicine has become a classic text in the field of free radical and antioxidant research. Now in its fifth edition, the book has been comprehensively rewritten and updated whilst maintaining the clarity of its predecessors. Two new chapters discuss 'in vivo' and 'dietary' antioxidants, the first emphasising the role of peroxiredoxins and integrated defence mechanisms which allow useful roles for ROS, and the second containing new information on the role of fruits, vegetables, and vitamins in health and disease. This new edition also contains expanded coverage of the mechanisms of oxidative damage to lipids, DNA, and proteins (and the repair of such damage), and the roles played by reactive species in signal transduction, cell survival, death, human reproduction, defence mechanisms of animals and plants against pathogens, and other important biological events. The methodologies available to measure reactive species and oxidative damage (and their potential pitfalls) have been fully updated, as have the topics of phagocyte ROS production, NADPH oxidase enzymes, and toxicology. There is a detailed and critical evaluation of the role of free radicals and other reactive species in human diseases, especially cancer, cardiovascular, chronic inflammatory and neurodegenerative diseases. New aspects of ageing are discussed in the context of the free radical theory of ageing.

This book is recommended as a comprehensive introduction to the field for students, educators, clinicians, and researchers. It will also be an invaluable companion to all those interested in the role of free radicals in the life and biomedical sciences.

From reader reviews:

Rebecca Stark:

What do you concerning book? It is not important with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is make you feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They have to answer that question due to the fact just their can do that. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need that Free Radicals in Biology and Medicine to read.

James Sanford:

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is within the former life are difficult to be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you have the unstable resource then you have it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Free Radicals in Biology and Medicine as the daily resource information.

Alma Brady:

Spent a free time for you to be fun activity to complete! A lot of people spent their leisure time with their family, or their friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the guide untitled Free Radicals in Biology and Medicine can be good book to read. May be it can be best activity to you.

Bruno Reed:

With this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you must do is just spending your time not much but quite enough to get a look at some books. One of many books in the top collection in your reading list is usually Free Radicals in Biology and Medicine. This book which is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking upwards and review this e-book you can get many advantages.
