Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques

Bryan M. Ham

Phosphorylation is the addition of a phosphate (PO_4) group to a protein or other organic molecule. Phosphorylation activates or deactivates many protein enzymes, causing or preventing the mechanisms of diseases such as cancer and diabetes. This book shows how to use mass spectrometry to determine whether or not a protein has been correctly modified by the addition of a phosphate group. It also provides a combination of detailed, step-by-step methodology for phosphoproteomic sample preparation, mass spectral instrumental analysis, and data interpretation approaches. Furthermore, it includes the use of bioinformatic Internet tools such as the Blast2GO gene ontology (GO) tool, used to help understand and interpret complex data collected in these studies.

From reader reviews:

Johanna Hernandez:

Nowadays reading books become more than want or need but also get a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that will improve your knowledge and information. The info you get based on what kind of book you read, if you want attract knowledge just go with education books but if you want truly feel happy read one having theme for entertaining like comic or novel. The Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques is kind of book which is giving the reader capricious experience.

Jennifer Darby:

The guide with title Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques includes a lot of information that you can understand it. You can get a lot of benefit after read this book. This book exist new information the information that exist in this e-book represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This book will bring you in new era of the internationalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Christine Kaufman:

In this age globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The particular book that recommended to you is Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques this guide consist a lot of the information from the condition of this world now. That book was represented just how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book acceptable all of you.

Annmarie Windham:

As we know that book is essential thing to add our understanding for everything. By a book we can know everything we really wish for. A book is a group of written, printed, illustrated or blank sheet. Every year was exactly added. This book Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques was filled in relation to science. Spend your free time to add your knowledge about your research competence. Some people has diverse feel when they reading a book. If you know how big benefit of a book, you can sense enjoy to read a e-book. In the modern era like right now, many ways to get book that you just wanted.
