Bio-Inspired Computing and Networking Yang Xiao

Seeking new methods to satisfy increasing communication demands, researchers continue to find inspiration from the complex systems found in nature. From ant-inspired allocation to a swarm algorithm derived from honeybees, **Bio-Inspired Computing and Networking** explains how the study of biological systems can significantly improve computing, networking, and robotics.

Containing contributions from leading researchers from around the world, the book investigates the fundamental aspects and applications of bio-inspired computing and networking. Presenting the latest advances in bio-inspired communication, computing, networking, clustering, optimization, and robotics, the book considers state-of-the-art approaches, novel technologies, and experimental studies, including bio-inspired:

- Optimization of dynamic NP-hard problems
- Top-down controller design for distributing a robot swarm among multiple tasks
- Self-organizing data and signals cellular systems
- Dynamic spectrum access in cognitive radio networks
- QoS-aware architecture for scalable, adaptive, and survivable network systems
- Locomotion control of the Hexapod Robot Gregor III

The book explores bio-inspired topology control and reconfiguration methods, as well as bio-inspired localization, synchronization, and mobility approaches. Providing wide-ranging coverage that includes past approaches, current challenges, and emerging concepts such as the evolution and self-healing of network architectures and protocols, this comprehensive reference provides you with the well-rounded understanding you need to continue the advancement of the development, design, and implementation of bio-inspired computing and networking.

From reader reviews:

Marvin Perdue:

Reading a guide tends to be new life style in this era globalization. With reading you can get a lot of information that may give you benefit in your life. With book everyone in this world may share their idea. Publications can also inspire a lot of people. Lots of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the ebooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their skill in writing, they also doing some analysis before they write for their book. One of them is this Bio-Inspired Computing and Networking.

Trevor Wright:

Typically the book Bio-Inspired Computing and Networking has a lot of knowledge on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. The author makes some research prior to write this book. That book very easy to read you may get the point easily after looking over this book.

Margaret Coleman:

People live in this new morning of lifestyle always aim to and must have the time or they will get large amount of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely without a doubt. People is human not just a robot. Then we ask again, what kind of activity have you got when the spare time coming to anyone of course your answer will unlimited right. Then ever try this one, reading books. It can be your alternative inside spending your spare time, the book you have read will be Bio-Inspired Computing and Networking.

Pearl Young:

Many people spending their moment by playing outside together with friends, fun activity with family or just watching TV all day long. You can have new activity to enjoy your whole day by examining a book. Ugh, you think reading a book really can hard because you have to accept the book everywhere? It ok you can have the e-book, having everywhere you want in your Mobile phone. Like Bio-Inspired Computing and Networking which is getting the e-book version. So , why not try out this book? Let's view.
