**Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28)** 65 Authors from the Astronautics Community

Space Mission Engineering: The New SMAD is an entirely new approach to creating both a text and a practical engineering reference for space mission design. Just as space technology has advanced, the way we learn and work has changed dramatically in recent years. SME combines the best features of a traditional unified text and reference covering the entire field, an electronic version that does many of the calculations for you, and the web that allows regular updates and references to the vast literature base available online. Among the many features of this new approach are: Completely rewritten, updated, and expanded follow-on to the 3rd edition of Space Mission Analysis and Design, the most widely used text and reference in astronautics, covering a great many topics not previously covered, such as CubeSats, Inflatable Structures, Space Economics, End-of-Mission options, Space System Risk Analysis, and new, much more precise formulas for ground station and target coverage. Downloadable electronic spreadsheets for most of the numerical tables and plots in the book that let you, for example, calculate all of the critical parameters for orbits about the Sun, Moon, Earth, and any of the other planets, or even new planets, moons, or stars of your choosing. An annotated bibliography and references on the web that is updated as new references become available and that shows you where to get nearly all of the references with direct links for those available at no cost and where on the web to buy copyright books and professional papers not available for free. All of the cross referencing, careful definitions, and thoroughly explained equations that are the key ingredient of any high quality engineering text or reference, along with the wisdom and experience gained at substantial cost by some of most experienced and knowledgeable space system engineers in the world. Want to talk to a real human being that can spell astronautics about the problem you need to solve? Send an E-mail inquiry about this book to [bookproject@smad.com](mailto:bookproject@smad.com). Want to get in touch with one of the authors, report a possible error, or find the reference you need? Call, or send us an E-mail. It is a small community, and we are here to help you find what you need to get the job done.

### **From reader reviews:**

#### **Judith Cole:**

Throughout other case, little men and women like to read book Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28). You can choose the best book if you love reading a book. Providing we know about how is important a book Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28). You can add understanding and of course you can around the world by the book. Absolutely right, since from book you can know everything! From your country until foreign or abroad you will end up known. About simple matter until wonderful thing you could know that. In this era, we could open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel uninterested to go to the library. Let's read.

#### **Jose Enriquez:**

Reading a guide can be one of a lot of task that everyone in the world adores. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a e-book you will get new information since book is one of a number of ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you studying a book especially fictional works book the author will bring you to definitely imagine the story how the figures do it anything. Third, you could share your knowledge to other people. When you read this Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28), you can tells your family, friends in addition to soon about yours guide. Your knowledge can inspire the others, make them reading a guide.

#### **Barbara Robbins:**

Do you have something that you want such as book? The guide lovers usually prefer to pick book like comic, small story and the biggest you are novel. Now, why not attempting Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28) that give your fun preference will be satisfied through reading this book. Reading practice all over the world can be said as the means for people to know world far better then how they react to the world. It can't be explained constantly that reading addiction only for the geeky person but for all of you who wants to become success person. So , for every you who want to start looking at as your good habit, you may pick Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28) become your own starter.

#### **Richard Lawrence:**

You are able to spend your free time to see this book this book. This Space Mission Engineering: The New SMAD (Space Technology Library, Vol. 28) is simple to bring you can read it in the area, in the beach, train and also soon. If you did not have got much space to bring often the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Thus there are a

lot of benefits that you will get when you buy this book.
