You might have heard the phrase “living off the grid” used for some time now but don’t have an idea of what it really means. Living off the grid means providing and relying on your own resources, rather than those of the community. It means you have the willingness to sacrifice material objects in order to achieve something for yourself. For example, spending money to earn more money. Since you are providing for yourself, it means you are not affected by anything going on around you, economically speaking, and you have no use for an excess of funds. If for miles around you there is a power outage, but you have your own source, you may not even know about it because it does not affect your home. To live off the grid means not having to worry about how the economy turns or what the crime rate is in your area.

Here is what you will learn after reading this book:

- Why you should consider off the grid
- Power your home
- How to make a steady income
- What off the gird living is truly like
- What to do about health care and insurance
