This book delves into time honored methods of creating beautiful landscapes and explores ways to use a DSLR to capture nature at its finest. It talks about the effort needed to locate the finest shots and the skills needed to take advantage of them.

Yes, there are suggestions for how to use filters, setting color balance, and setting the ISO; but there is also an explanation of the Golden Mean, and references to the times known among photographers as the Golden hours – the times when the shadows are strong, and the sky is spectacular.

Because photography is an art; the camera is a tool; and the photographer is an artist who must hone the skills needed to catch the eyes, the minds and the hearts of those who behold the landscapes.
