**Modelling of GPCRs: A Practical Handbook** Andrea Strasser, Hans-Joachim Wittmann

G protein coupled receptors (GPCRs) comprise an important protein family, which is involved in signal transduction in the cell. Besides that a large number of drugs, available on market, address GPCRs. For an efficient and improved development of appropriate drugs, molecular modelling of GPCRs is – in order to understand the ligand-receptor interactions and functionality of GPCRs on molecular level - an important tool. The book “Modelling of GPCRs – a practical handbook” is focussed onto a practical introduction into molecular modelling of GPCRs. This book is very useful for beginners in GPCR modelling, but also addresses the advanced GPCR modeller: On the one hand, the book introduces principles of GPCR modelling, including extensive examples. On the other hand, detailed outlooks onto advanced GPCR modelling techniques are presented. Furthermore, the book includes important data, like information about crystal structures in a summarized manner or amino acid sequences, which are essential for GPCR modelling in general. Due to an increase in efficacy and data handling most modellers use LINUX as operating system. To address this, a summary of most important LINUX commands with examples is presented within the book.

### **From reader reviews:**

#### **Leticia Hodges:**

Spent a free time to be fun activity to try and do! A lot of people spent their free time with their family, or their very own friends. Usually they undertaking activity like watching television, planning to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book could be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the guide untitled Modelling of GPCRs: A Practical Handbook can be excellent book to read. May be it could be best activity to you.

#### **Owen Bourne:**

Many people spending their moment by playing outside together with friends, fun activity along with family or just watching TV the entire day. You can have new activity to spend your whole day by reading through a book. Ugh, think reading a book can definitely hard because you have to use the book everywhere? It ok you can have the e-book, getting everywhere you want in your Cell phone. Like Modelling of GPCRs: A Practical Handbook which is finding the e-book version. So , why not try out this book? Let's observe.

#### **Ronald Smith:**

That reserve can make you to feel relax. This specific book Modelling of GPCRs: A Practical Handbook was multi-colored and of course has pictures on the website. As we know that book Modelling of GPCRs: A Practical Handbook has many kinds or variety. Start from kids until youngsters. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that will.

#### **Nicole Powell:**

Many people said that they feel fed up when they reading a e-book. They are directly felt the item when they get a half areas of the book. You can choose often the book Modelling of GPCRs: A Practical Handbook to make your current reading is interesting. Your own personal skill of reading ability is developing when you such as reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be very first opinion for you to like to start a book and learn it. Beside that the book Modelling of GPCRs: A Practical Handbook can to be your friend when you're sense alone and confuse with the information must you're doing of these time.
