Super Cancer Fighters: Proven Natural Remedies That Supplement Mainstream Cancer Treatments Bill Bodri

Finally you don't have to choose between mainstream and alternative cancer therapies. There are some small things you can do at home which have very big results that complement traditional therapies.

Most people hear a diagnosis of “cancer” and immediately think it is a death sentence because of the poor results that mainstream chemotherapy, surgery and radiation treatments typically achieve. However, there are also integrative physicians and international cancer clinics which use a combination of holistic, complementary medicine therapies to help people get well. Some of these alternative approaches have achieved genuine cancer cure rates as high as 90%, but ordinary oncologists rarely use them.

If you are not being treated by an integrative physician, the question arises as to which of these extra things can you do at home to help yourself when you are on the road of mainstream cancer treatments. Certain supplemental therapies can actually make radiation or chemotherapy treatments safer and their results better. They can give you more energy and help you recover faster to feel like your old self sooner. They can reduce infections, prevent cachexia and dramatically increase your chances for a perfect recovery. Even if your oncologist sadly says that he can do nothing more, there are definitely some alternative therapies you can immediately try that just might save your life.

In short, there is a large variety of proven, supplemental aids that can complement traditional mainstream cancer treatments. Many of these complementary approaches, synergistic with traditional therapies, are helpful because they are considered cancer cures on their own. However, many doctors don't know about them or are not legally allowed to discuss them or prescribe them. Thus, you will rarely hear about them despite worldwide track records showing that they have saved thousands.

Inside this book you will learn about the easiest and most inexpensive of these supplemental therapies commonly used by integrative physicians and world famous cancer clinics. All of these cancer aids are simple remedies that typically complement and supercharge mainstream therapies in a synergistic fashion, and which anyone can use with ease in their own home.

You will discover the basic cancer diet principles you should follow to maximize your chances of getting well regardless of any other cancer treatments you follow. In order not to be overwhelmed with expensive choices, you will also learn the most beneficial nutraceutical supplements commonly used in alternative cancer treatments (and how to use them) along with a variety of the best alternative therapies you can privately use which have a long proven history of beating cancer.

Just a few of these therapies include the Beljanski botanicals that work on correcting the process of DNA replication inside cancer cells, Carnivora that lowers the ATP energy inside cancer cells so that they start falling apart, the Budwig flaxseed oil and cottage cheese mixture that rebuilds faulty cells by increasing cellular respiration through electron-rich fatty acids, proteolytic enzymes that eat away at protein-thick cancer cell membranes, and various other naturopathic remedies that attack cancer using different approaches than those used in ordinary cancer centers. Some of these natural supplemental approaches help thwart angiogenesis or stop cancer metastasis in its tracks, radically reduce the size of large tumors quickly,

or alkalize cancer cells so that they simply cannot survive.

Once you know about these Super Cancer Fighters, the science behind them and their track record of success, then you and your health care team can use this information to boost your treatment plans and maximize your chances of beating cancer to get well.
