Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle

John Frederick Herkamp

Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle John Frederick Herkamp

Neutralization of remotely operated Improvised Explosive Devices (IEDs) is a dangerous task risking human lives on a daily basis. BigFoot seeks to replace the local human component by deploying and remotely detonating shaped charges to destroy IEDs. This research developed a platform that can autonomously navigate GPS waypoints, avoid obstacles, and provide remote user controls for an onboard robotic arm to deploy and remotely detonate shaped charges. BigFoot incorporates improved communication range over previous Autonomous Ground Vehicles and an updated user interface that includes controls for the arm and camera by interfacing multiple microprocessors. BigFoot is capable of avoiding static and mobile obstacles as well handling most surfaces with minor slopes. BigFoot continues to be somewhat limited by communications range and GPS availability. However, BigFoot is an ideal platform for relatively short range deployment to neutralize roadside IEDs.

From reader reviews:

Marcus Galvan:

In this 21st centuries, people become competitive in each and every way. By being competitive currently, people have do something to make them survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive enhance then having chance to remain than other is high. For you who want to start reading any book, we give you this Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle book as nice and daily reading book. Why, because this book is more than just a book.

Delbert Lambert:

The actual book Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle will bring one to the new experience of reading a new book. The author style to clarify the idea is very unique. Should you try to find new book to learn, this book very acceptable to you. The book Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle is much recommended to you to see. You can also get the e-book from the official web site, so you can quickly to read the book.

Terrence Kimball:

Spent a free time to be fun activity to do! A lot of people spent their leisure time with their family, or their friends. Usually they undertaking activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Can be reading a book can be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to consider look for book, may be the e-book untitled Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle can be fine book to read. May be it could be best activity to you.

Jeanette Williams:

Don't be worry for anyone who is afraid that this book will filled the space in your house, you could have it in e-book way, more simple and reachable. This specific Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle can give you a lot of close friends because by you taking a look at this one book you have thing that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't know, by knowing more than some other make you to be great people. So , why hesitate? Let me have Deployment of Shaped Charges by a Semi- Autonomous Ground Vehicle.
